❖ Current position

Marie Skłodowska-Curie Astrofit fellow, INAF - Osservatorio di Astrofisica e Scienza dello Spazio di Bologna, Italy

❖ Academic history

- | | |
|-----------|--|
| 2017-2019 | ❖ INFN fellow
Istituto Nazionale di Fisica Nucleare , Bologna, Italy
Mentor: Prof. Fabio Finelli |
| 2015-2017 | ❖ PCCP fellow
Paris Centre for Cosmological Physics, Astroparticule et Cosmologie , Paris, France
Mentor: Prof. George F. Smoot III |
| 2013-2015 | ❖ Post doctoral fellow
Asia Pacific Centre for Theoretical Physics , Pohang, Korea
Mentor: Prof. Arman Shafieloo |
| 2006-2012 | ❖ Integrated M.Sc.–Ph.D. Physics
Harish Chandra Research Institute , Allahabad, India
Thesis topic: Primordial features and non-Gaussianities
Thesis supervisor: Prof. L. Sriramkumar |
| 2003-2006 | ❖ B.Sc. Physics
Jadavpur University , Kolkata, India |

❖ Research interests

- ❖ Constraining primordial excitations of the Universe using Cosmic Microwave Background (CMB) and Large Scale Structure (LSS)
- ❖ Witnessing the history of reionization
- ❖ Beyond the concordance: exploring new physics with the observations

Last updated: August 18, 2019

❖ Publications and preprints

Published paper and letters, preprints, survey collaboration papers, conference proceedings and upcoming works are listed below.

❖ JOURNAL ARTICLES AND LETTERS

Published papers in refereed journals are presented in reverse chronological order of publication.

❖ CONFERENCE PROCEEDING

- 2014 A. Shafieloo, **D. K. Hazra** and T. Souradeep, *Primordial Spectrum and Cosmological Parameters*, *JPS Conf. Proc.* **1**, 013094 (2014)

❖ Participation in cosmological surveys

- ❖ I am a member of CMB-BHARAT Consortium and I have lead the *Cosmological Parameters* working group in the proposal for the fourth generation CMB space mission submitted to the Indian Space Research Organisation on April 16, 2018.
- ❖ I am a member of [Euclid Consortium Collaboration](#). I am working on forecasts on initial condition.

❖ Numerical codes and simulations developed

- ❖ [BINGO \(BI-spectra and Non-Gaussianity Operator\)](#) (in Fortran 90): Calculates the non-Gaussianity (three-point correlations of perturbations, bispectrum) and the power spectrum from any single canonical scalar field model of inflation. This is the first public code to calculate the inflationary bispectrum.
- ❖ A Fortran 90 code that evaluates the perturbation spectra in two field inflationary models. The code takes the iso-curvature perturbations into account exactly, and it evaluates the curvature and iso-curvature perturbation spectra as well as the correlations between them. In addition to evaluating the scalar power spectra, the code also evaluates the tensor power spectrum.
- ❖ A code suite for deconvolution, including Landweber iteration, modified Richardson-Lucy (MRL) algorithm (designed in collaboration with Prof. Shafieloo and Prof. Souradeep), singular value decomposition, Tikhonov regularization, aimed towards general deconvolution problems that can be used in different areas of astrophysics involving point spread functions and convolution integrals. MRL has been used in [JCAP 1411, 011 \(2014\)](#), [Phys. Rev. D 87, 123528 \(2013\)](#) and [JCAP 1307, 031 \(2013\)](#).
- ❖ Code for mass function of halos from arbitrary inflation models and arbitrary dark energy models and implemented in [JCAP 1303, 003 \(2013\)](#).
- ❖ Prepared software pipeline for statistical analysis of quasar Lyman- α forest data for SDSS-BOSS data (independent of quasar surveys) and implemented in [JCAP 1511, 012 \(2015\)](#). An extended version is being prepared for the continuum estimation of quasars.
- ❖ Developed semi-analytical simulations for Lyman- α forest.
- ❖ Developed highly parallel cold dark matter simulation code ‘COSMOS’ in collaboration with Dr. Appleby and Dr. Sypsas. Presently being benchmarked for forthcoming Euclid and LSST type data.
